

Jaya Krishna Pavan Mummaneni

+91-7013342241 | jkpm4321@gmail.com | LinkedIn | GitHub | Portfolio

Professional Summary

Detail-oriented **Software Engineer** with a strong foundation in the **MERN stack** and **Salesforce ecosystem**. Expert in architecting bi-directional data synchronization services, integrating LLMs (Gemini API) for workflow automation, and building scalable RESTful architectures. Winner of the Agent X Hackathon, recognized for bridging the gap between CRM systems and modern web applications.

Education

Malla Reddy University

Bachelor of Technology in Computer Science; CGPA: 8.95 / 10.0

Hyderabad, India

Expected May 2026

- **Relevant Coursework:** Data Structures & Algorithms, Database Management Systems (DBMS), Operating Systems, Object-Oriented Programming (Java), Computer Networks, Generative AI.

Technical Skills

Languages: Python, JavaScript (ES6+), Java, SQL, Apex, HTML/CSS

Frameworks/Libraries: React.js, Node.js, Express.js, Streamlit, Tailwind CSS, Bootstrap

Salesforce: CRM, LWC (Lightning Web Components), Agentforce, Flow Automation, SOQL

Databases & Tools: MongoDB (Atlas), MySQL, Git, GitHub, Vercel, Render, Postman, JWT

Cloud/AI: Gemini API, OpenAI API, NASA API, Scoped AI Processing, Vector Embeddings

Projects

ForceLink CRM | *React, Node.js, Salesforce API, Gemini API, MongoDB*

Feb 2026

- Engineered a high-concurrency **middleware service** to synchronize data between Salesforce and MongoDB using controlled write-through APIs, reducing data latency by 40%.
- Implemented **RBAC (Role-Based Access Control)** and record ownership validation to ensure multi-tenant security and prevent overwrite conflicts during concurrent updates.
- Integrated **Gemini AI** to perform semantic analysis on CRM records, providing users with automated follow-up priorities and actionable lead summaries.
- Developed a companion mobile-responsive UI allowing field agents to update records with immediate backend validation.

SmartMatch Resumes | *Python, NLP, Scikit-Learn, Streamlit*

June 2025

- Developed an automated screening tool using **Natural Language Processing (NLP)** to rank resumes against job descriptions with 92% accuracy compared to manual screening.
- Utilized **TF-IDF Vectorization and Cosine Similarity** to calculate relevance scores and extract key technical competencies from unstructured PDF data.
- Designed an interactive dashboard that provides real-time feedback and keyword gap analysis for candidates.

CosmicNews | *MERN Stack, NASA Open APIs, Axios*

July 2025

- Architected a unified data layer to aggregate heterogeneous data from 3+ NASA APIs into a normalized JSON schema for frontend consumption.
- Implemented a **custom caching strategy** and modular backend services, reducing external API calls by 50% and improving page load speeds.
- Integrated **JWT Authentication** to provide personalized user feeds and persistent storage for saved celestial events.

Achievements & Certifications

- **Winner — Agent X Hackathon (2026):** Developed an AI-driven onboarding assistant for Salesforce using Agentforce, judged on innovation and technical feasibility.
- **Salesforce Certified Agentforce Specialist (Dec 2025):** Validated expertise in building autonomous AI agents and complex flow automations within the Salesforce ecosystem.
- **Open Source Contributor:** Actively maintaining scripts for automated data cleaning and API normalization on GitHub.
