

Jaya Krishna Pavan Mummaneni

+91-7013342241 | jkpm4321@gmail.com | LinkedIn | GitHub | Portfolio

Professional Summary

Detail-oriented **Software Engineer** with a strong foundation in the **MERN stack** and **Salesforce ecosystem**. Expert in architecting bi-directional data synchronization services, integrating LLMs (Gemini API) for workflow automation, and building scalable RESTful architectures. Winner of the Agent X Hackathon, recognized for bridging the gap between CRM systems and modern web applications.

Education

Malla Reddy University

Bachelor of Technology in Computer Science; CGPA: 8.95 / 10.0

Hyderabad, India

Expected May 2026

- **Relevant Coursework:** Data Structures & Algorithms, Database Management Systems (DBMS), Operating Systems, Object-Oriented Programming (Java), Computer Networks, Generative AI.

Technical Skills

Languages: Python, JavaScript (ES6+), Java, SQL, Apex, HTML/CSS

Frameworks/Libraries: React.js, Node.js, Express.js, Streamlit, Tailwind CSS, Bootstrap

Salesforce: CRM, LWC (Lightning Web Components), Agentforce, Flow Automation, SOQL

Databases & Tools: MongoDB (Atlas), MySQL, Git, GitHub, Vercel, Render, Postman, JWT

Cloud/AI: Gemini API, OpenAI API, NASA API, Scoped AI Processing, Vector Embeddings

Projects

ForceLink CRM | *React 19, Node.js, Salesforce API, Gemini 2.5 Flash, MongoDB Atlas* Feb 2026

- Architected a **hybrid “Headless Salesforce”** system using MERN stack, treating Salesforce as a governed backend data layer while delivering a fully customizable React 19 SPA with a mobile-responsive companion app.
- Engineered a **multi-tiered rate-limiting middleware** with 4 traffic channels (global flood, auth, AI cost, sync) that blocked 100% of tested brute-force and DoS attacks while maintaining zero error rates at 50 concurrent users.
- Implemented a **RAG pipeline** using Gemini 2.5 Flash (temp=0.2) with dynamic CRM context assembly, achieving 48% faster response times (1.8s) vs. GPT-4o (3.5s) for lead analysis and opportunity forecasting.
- Designed a **rollback mechanism** and ownership-verified write operations ensuring strong consistency between MongoDB and Salesforce, achieving a 42% reduction in data retrieval latency via parallel sync and local caching.

SmartMatch Resumes | *Python, NLP, Scikit-Learn, Streamlit*

June 2025

- Developed an automated screening tool using **Natural Language Processing (NLP)** to rank resumes against job descriptions with 92% accuracy compared to manual screening.
- Utilized **TF-IDF Vectorization and Cosine Similarity** to calculate relevance scores and extract key technical competencies from unstructured PDF data.
- Designed an interactive dashboard that provides real-time feedback and keyword gap analysis for candidates.

CosmicNews | *MERN Stack, NASA Open APIs, Axios*

July 2025

- Architected a unified data layer to aggregate heterogeneous data from 3+ NASA APIs into a normalized JSON schema for frontend consumption.
- Implemented a **custom caching strategy** and modular backend services, reducing external API calls by 50% and improving page load speeds.
- Built personalized user feeds with persistent storage for saved celestial events using secure session management.

Achievements & Certifications

- **Winner — Agent X Hackathon (2026):** Developed an AI-driven onboarding assistant for Salesforce using Agentforce, judged on innovation and technical feasibility.
- **Salesforce Certified Platform Developer I (Mar 2026):** Demonstrated proficiency in developing custom applications on the Salesforce platform using Apex, LWC, and declarative tools.
- **Salesforce Certified Agentforce Specialist (Dec 2025):** Validated expertise in building autonomous AI agents and complex flow automations within the Salesforce ecosystem.
